Skyhook®
digital anchor
by Mercury Marine®

Keep your boat in place with the push of a button

Mercury Skyhook digital anchor allows you to lock your boat’s position using a GPS satellite antenna. Then, working with your engines and drives, Skyhook maintains your position and heading regardless of wind or current.

Key features

• Ideal for holding the boat over a fishing spot, waiting for bridges to open or holding position while next in line at a fuel docking station.

• GPS technology and electronic compass automatically control shifting, throttling and steering to maintain heading and approximate position.

• Simple to operate – just place the levers in neutral and push the Skyhook button to lock position and heading.
